DETAILED ACTION

Response to Amendment

1. The amendment was received on 8/9/07. Claims 1-13 and 17 are pending.

Response to Arguments

2. Applicant's arguments, see remarks, page 8, last sentence to page 9, lines 1,2, with respect to 102(e) and "protrudes" have been fully considered and are persuasive. The rejection of claims 1-13 has been withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-13 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Detecting a protrusion when given a single image does not make sense:

Claim 1 is claiming an input image data including the data region where both are rotated and detecting a protrusion of the same rotated input image including the rotated data region which does not make physical sense. Unless, both the input image data and the data region where separated from each other, as applicants figure 2, numerals 113 and 114 suggests, so that there were two separated input images that are rotated relative to each other so that a protrusion can easily be distinguished or seen from the two separated images.

The examiner suggests adding a step of "separating the data region from the input image data" between the first and second steps of claim 1.
